

CAPABILITIES STATEMENT

PRODUCT INFORMATION

Tullco, Inc. is a manufacturer of machining fluids. For over forty-five years, Tullco, Inc., has been a family owned, Service Disabled Veteran Owned Small Business solving many machining and fabricating problems. We manufacture water-soluble, polymer-based machining fluids. We have developed our exceptional products: Premier Poly-Cut™, Poly-Cut™, Poly-Form™ and Poly-Cut Defoamer™. These products have enabled Tullco, Inc., to solve many common problems related to the machining industry.

Our unique “EP Polymer” is what makes Premier Poly-Cut™ capable of being used in virtually every application within the machining industry. In addition to metals, our products can be used to machine plastics, acrylic, glass, ceramics, rubber, and carbide.
